Enterprise-level expertise with a background in ecommerce and finance including Fortune 100 companies. Experienced across multiple programming languages, frameworks and technologies with an emphasis on Javascript/Typescript and .NET-based services.

TECHNICAL SKILLS

Programming Languages

JavaScript, TypeScript, C#, C, C++, Java, Python, SQL

Frameworks

React, SvelteKit, Angular, .NET

Cloud Technologies

Docker, Kubernetes, AWS (Aurora, DynamoDB, S3)

Development Practices

Microservices Architecture, RESTful APIs, CI/CD Collaboration, Developer Tooling

PROFESSIONAL EXPERIENCE

Contract Software Engineer

Northwestern Mutual — Remote

July 2024 – Present

- Maintain and develop distributed microservices pertaining to the Alerts and Notifications platform.
- Partner with internal teams and external publishers to onboard new applications, distribute batched emails and ensure compliance with legal.

- Contribute to platform stability and developer efficiency through targeted API enhancements and workflow improvements.

Selected Contributions

- **Email Template Generation Platform**

Designed and implemented a self-service application enabling publishers to create recipient-specific, Northwestern Mutual-branded email communications while enforcing legal and compliance standards programmatically.

- **Developer Efficiency API Enhancements**

Delivered new database microservice endpoints pertaining to internal databases that eliminated repetitive development tasks, reducing friction and accelerating feature delivery across dependent teams.

Digital Marketing Specialist

Bare Home — Columbus, MN

January 2023 – October 2023

- Developed a new Shopify website for ecommerce using Javascript and Liquid.
- Created and managed digital advertisement campaigns through Google Ads.
- Improved analytics tracking through website enhancements.
